Welcome and Introductions

Ivonne Tapia convened the meeting at 8:35 a.m. and called for introductions.

Consortium General Meeting with FLC Focus

Ms. Tapia called on Enrique Mata who provided details for the El Paso Behavioral Health Consortium General Meeting to be held on Thursday, March 21st at the El Paso Community College's Administrative Service Center Board Room. Mr. Mata and Mr. Lachica recognized Dr Graham for her assistance in confirming the location and provided summary information about the presenters and run of show as of this date.

Help Me Grow Initiative

Laura Marquez provided an update on the Help Me Grow initiative. Ms. Marquez commented that they are on track with progress collaborating with five champion pediatric practices and in their work to develop a strong resource referral system for providers.

CPAN/TCHAT Update

Dr Sarah Martin and Adrienne Harrel provided a summary of progress with the TCHAT program. The efforts to get all school districts in the region has been challenging. However, it is likely that EPISD will be on board soon. Dr Martin also stated that they are seeing positive results from the TCHAT program with most youth needing only the 5 counselling sessions for positive results. Ms. Harrell added that the need for staff is becoming urgent and anyone seeking to work with the Texas Tech Team, please refer them over.

Mental Health Starts with Me

Ms. Andrea Rios presented on the new program El Paso Child Guidance Center is launching targeting outer areas of El Paso County such as San Elizario and Fabens. Presentation slides are included with these notes.

Other Business

- Family Advisory Council Feedback – Ronsoni Long – Mr. Long provided an overview of the work of the Strong Families advisory council and how they gather feedback from those who participate in parent cafes.

- Bob and Barbara Zielinski – www.MarriageManagement.org Mr. Bob Zielinski provided information to the group on the services he and his wife provide for veterans and their families. He stated that these services are covered and of no financial burden to the veteran.
- School based services spreadsheet – Josue Lachica reviewed the school-based services spreadsheet with the group. He responded to questions and made modifications as directed.

Adjourn – Ivonne Tapia Adjourned the meeting at 10:05 am

2020 Continuum Of Care Model for El Paso County Child and Family Behavioral Health

Source: Based on the 1994 IDM Continuum of Care Protractor model and the Family Leadership Council Mental Health Foster Care work group service mapping of 2015-2016.
Update: September 11 2019 based on changes in NAS 2019 Report Fostering Healthy Mental, Emotional, and Behavioral Development in Children and Youth: A National Agenda

Promotion

- Societal** • poverty and inequality, discrimination, marketing of unhealthy products and effects of involvement with the criminal justice system.
- Community** • Neighborhood attributes, school organization and characteristics, and foster care.
- Individual and Family** • Attachment, parental health, parenting practices and Mental and Emotional well-being health, (preventing ACEs)
- Universal** • PBIS culture in schools, Parental engagement in schools, Quality out of school youth Programs, Mental Health First Aid Certification
- Selective** • NAMI Education Programs; Parent support groups; Peer support specialists and advocacy groups
- Indicated** • Increased family & student support; Teacher/other school support; Student - self identifies or friend; Timely appropriate referral.

Promotion

Case identification

Treatment of Disorders

- Timely appropriate OX and care plan: School or school health center; Primary care; Mobile Crisis Team; Hospital or psychiatric ED
- Inpatient - EPPIC, EPBH, RIOVISTA, PEAK, LOC 4 - YES, MST or Wagaround, LOC 3 - intensive therapy, Therapy MH/SA; LOC 2 - Ind. and Fam. Therapy MH/SA; LOC 1 - individual therapy MH/SA

Compliance with LT Treatment

- Juvenile justice diversion programs; Medical home coordination with BH provider; Family support systems; Access to appropriate therapy and medication

After Care

- Managing triggers and care as needed; MH/SA School based health center Svcs.; Family support (incl. Foster Care families); Active involvement in child/youth out of school programs

Consortium General Meeting with FLC Focus

- **El Paso child and youth Hot Topics:**
- **Increases in federal funding and how that is improving service capacity**
- **EHN System of Care project**
- **Help Me Grow**
- **First Episode Psychosis**
- **Schools?**
- **Collaborative Care**
- **CPAN/TCHAT**
- **9-8-8 and Youth Crisis Outreach (YCOT) Teams**
- **Child, youth and family Policy improvements from the 88th Legislative Session and what to expect in the 89th**
- **Juvenile justice system transformation**
- **Exploring the Interaction Between Mental Health and Substance Use Trends (e.g., THC felony)**

- **A VA Wellness Center in the Medical Center of the Americas**
- **Cohen Veterans Network and Endeavors coming to the community to serve veterans and their families as well as providing services for homelessness and migration conditions.**
- **The Veterans One Stop Shop at EHN**
- **UMC El Paso and EHN Partnership to Integrate Social Workers within outpatient service centers**
- **Rio Vista Behavioral Health adding 120 mental health beds plus outpatient services.**
- **Providing better coordination of care using peer support specialists and trained navigators with lived experience to help keep people connected to services;**
- **Enhancing technology like telehealth options and electronic exchange of health records;**
- **Increasing knowledge and skill of providers in the most up to date treatments available;**
- **Increasing availability of hotlines and helplines, mobile crisis teams, walk-in crisis clinics, hospital-based psychiatric emergency services, and family education and support programs.**

Family Leadership Council Roles:

Meetings scheduled once every other month for no more than 2 hours.

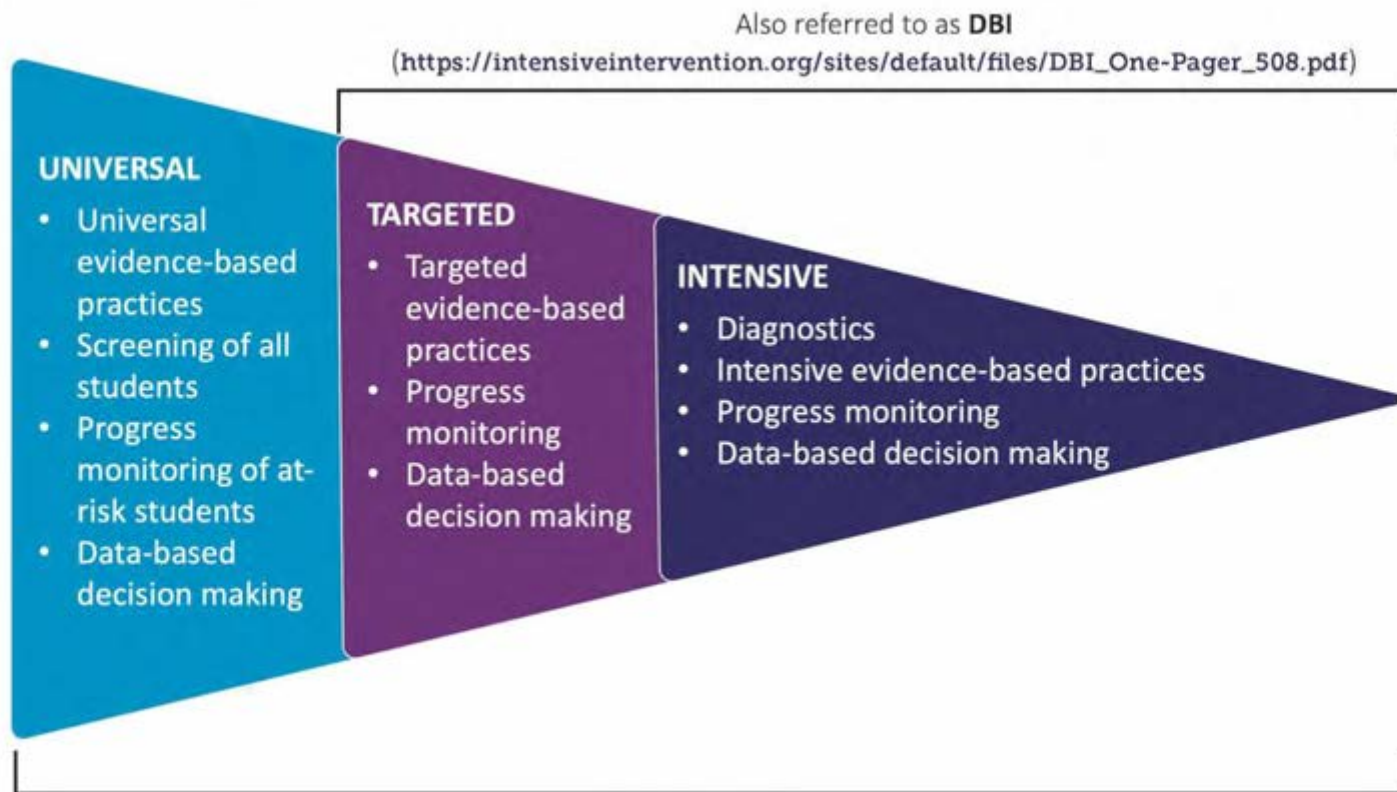

- Provide executive leadership for work groups and task forces
- Approve Council System Improvement Priorities
- Approve strategies, shared measures and progress indicators
- Assign work group or task force organizational representation (e.g., designate representatives/subject matter specialists)
- Identify areas in need of policy or practice improvement (e.g., organizational policy changes or state/national policy)

FLC Work Group and Task Force Roles:

Meetings scheduled as needed

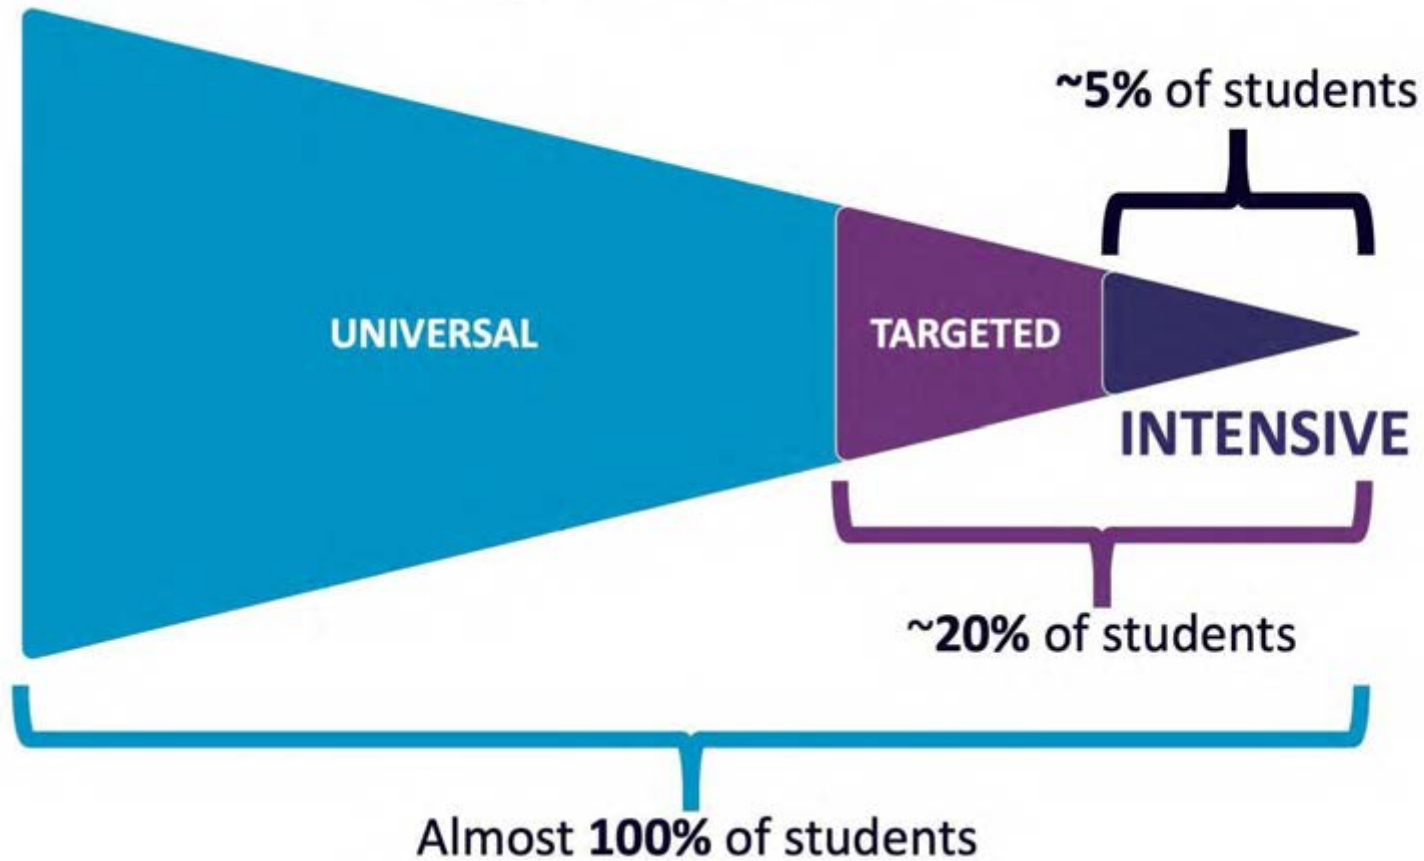

- Collaborate or coordinate to maximize resources
- Identify existing community groups or organizations implementing programs to assure positive synergy
- Work with representation at all levels within the system of care to implement approved strategies
- Coordinate with funders and technical support advisors

Figure 1: MTSS Components and Other Support Systems

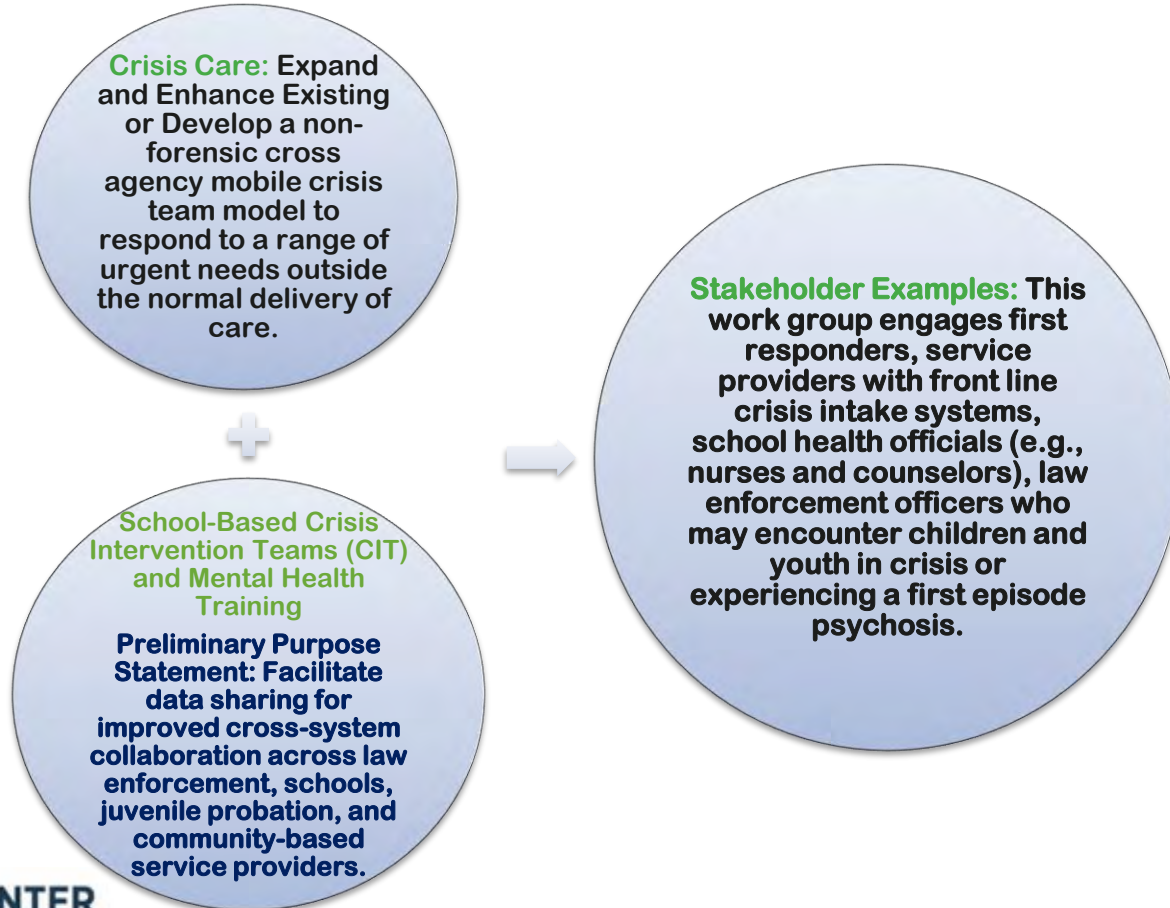

Figure 2: The MTSS Tiers

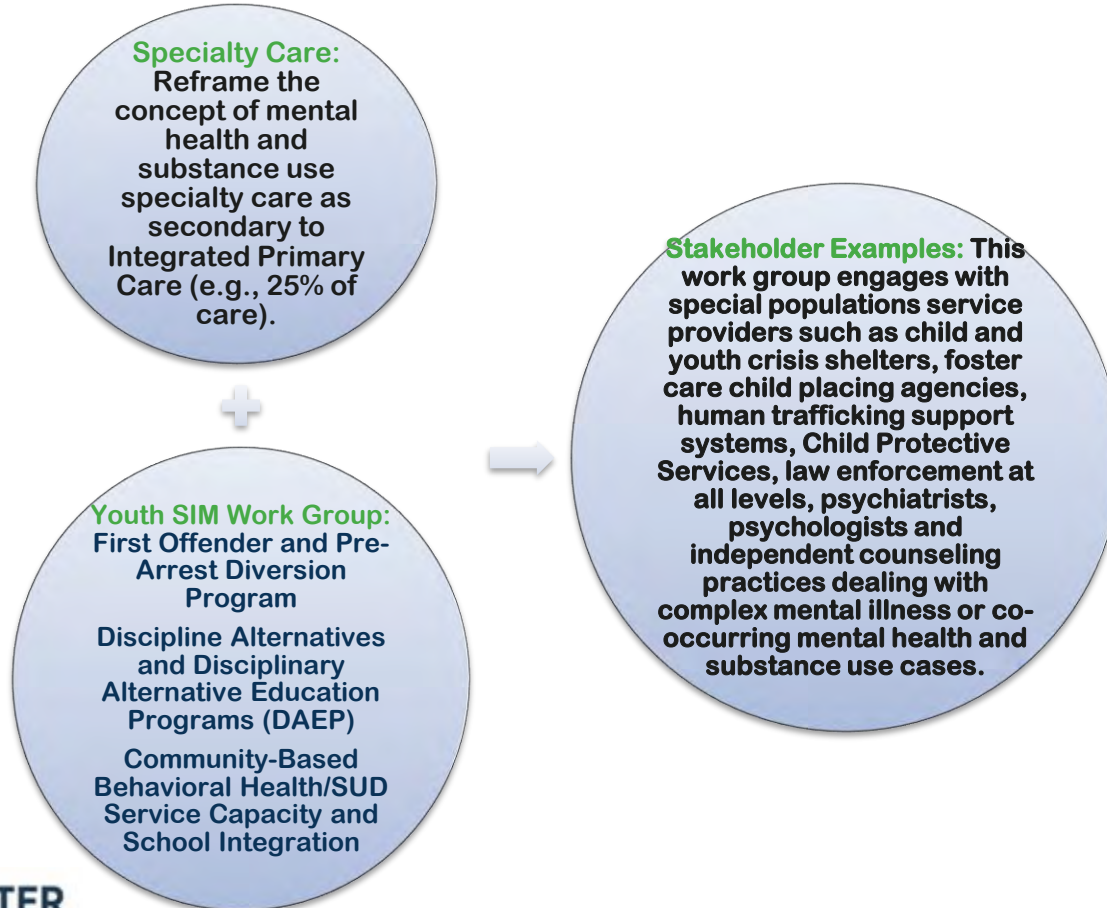

Work Group Consolidation – Primary Care and Youth SIM Work Groups

Work Group Consolidation - Crisis Care and School Based CIT

Work Group Consolidation – Specialty Care and Youth SIM Work Groups

Work Group Overview – Primary Care

Primary Care: Expand and Enhance Integrated and Collaborative Care models for mental healthcare and related support access in the pediatric and primary care settings.

Youth SIM Work Group: School-Based Crisis Intervention Teams (CIT) and Mental Health Training First Episode Psychosis

Highlight: Could this be the **First Touch** work group? – Identifying needs and maintaining upstream support (e.g., refer to first – preventive – primary care – school based interventions like TCHAT and CIT – not falling into the mental health system of care unless absolutely necessary).

Work Group Overview - Crisis Care – School Based CIT

Crisis Care: Purpose Expand and Enhance Existing or Develop a non-forensic cross agency mobile crisis team model to respond to a range of urgent needs outside the normal delivery of care.

School-Based Crisis Intervention Teams (CIT) and Mental Health Training

Preliminary Purpose: Facilitate data sharing for improved cross-system collaboration across law enforcement, schools, juvenile probation, and community-based service providers.

Highlights:

- Humane and caring assessment and transport that is not connected to the justice system. Justice involvement should be the last resort.
- Clarify role and definitions of outreach, youth trained responders.
- Anecdotal: Child and adolescent concerns are that the numbers are continuing to rise since covid and they do not appear to be looking like they could decrease anytime soon.
- There are not enough service options for children.

Work Group Overview - Specialty Care – Youth SIM

Specialty Care: Reframe the concept of mental health and substance use specialty care as secondary to Integrated Primary Care (e.g., 25% of care).

Youth SIM Work Group:

- First Offender and Pre-Arrest Diversion Program
- Discipline Alternatives and Disciplinary Alternative Education Programs (DAEP)
- Community-Based Behavioral Health/SUD Service Capacity and School Integration

Highlights:

- **Revisit the idea of an RTC for El Paso area. Explore numbers of youth in justice that where RTC may work better**
- **Explore other wraparound options other similar models?**

Opportunities and Strategies

Primary Care

Opportunity For Change: Expand and Enhance Integrated and Collaborative Care models for mental health and related support access in the pediatric and primary care settings.

Strategy I - Clearly identify mental health and substance use care and support that can efficiently and effectively be coordinated or directly provided within the primary care setting. For example, pediatrician and staff trained for assessment and care planning to address early child anxiety symptoms providing care and support or coordinating with counseling and specialty care as needed (e.g., CMA, Collaborative Care Managers).

Value Proposition - Improving capacity to provide mental health service and support access through the pediatrician and primary care setting decreases stigma and negative bias to seeking appropriate care, increases timely, accurate and effective treatment of mental health condition symptoms.

Crisis Care

Opportunity For Change: Expand and Enhance Existing or Develop a non-financial cross agency mobile crisis team model to respond to a range of urgent needs outside the normal delivery of care.

Strategy I - Analyze what types of needs are unique to children, youth, and families and how responses to those needs must be designed. A definition for the phrase "range of urgent needs outside the normal delivery of care" will be necessary with focus both on what the particular needs are and then why they lie outside the "normal delivery of care".

Strategy II - Explore community capacity to serve those experiencing First Episode Psychosis (FEP) as part of the child, youth, and family service array.

Value Proposition - Data within this 2013 El Paso System Assessment asks adult, and children's crisis care common approaches where appropriate, for example, 80 and 892, calls involving families and children and up going to the same call centers as calls involving adults. A seamless dispatch system for crisis care increases likelihood for access to appropriate care and improves opportunity for successful recovery.

Specialty Care

Opportunity For Change: Reframe the concept of mental health and substance use specialty care as secondary to Integrated Primary Care (e.g., 75% of care).

Strategy I - As with primary care, clearly identify mental health and substance use care and support that is beyond the scope of practice and cannot be directly provided within the primary care setting. For example, serious mental health conditions that require an intensive coordinated approach with psychiatry, psychology, counseling, or substance use specialty care.

Strategy II - Expand and enhance availability of well-established evidence-based interventions for youth with more severe behavioral problems related to willful misconduct and delinquency (e.g., increase availability of child psychiatrists and child psychologists, increase availability and effective use of collaborative care model options (psychiatry, counseling, and primary care services).

Strategy III - Utilize the Multisystemic Therapy Ruler to promote timely wraparound support for children with complex needs to prevent entry into the Foster Care or Justice System.

Strategy IV - Improve residential support options to prevent children from inappropriately leaving for residential treatment out of town, including increasing compensation for foster parents and reimbursement options for nontraditional programs and expanding intensive Medicaid services to support foster families.

Value Proposition - Well coordinated availability of top specialty care approaches for those in need contributes to increased likelihood of successful and lasting recovery. Work Groups: School Mental Health and Foster Care.

Recovery Care

Opportunity For Change: Improve integration of acute inpatient care within the broader health system continuum of care (e.g., appropriate, and well-coordinated, transition care and support from inpatient to outpatient to Integrated Primary Care setting).

Strategy I - Expand on-site integrated primary care (IPC) capacity (e.g., upgrade technology and HE, Explore Child Psychiatry Access Network (CPAN) scaling).

Strategy II - Increase membership within the PH Health Information Exchange, especially large provider networks and behavioral health hospitals (e.g., Rio Vista and El Paso Behavioral Hospital).

Effective use of health information exchange will help ensure timely and efficient continuity of care and recovery. Connecting and sharing vital confidential e healthcare continuum is shown to have a significant positive impact on overall

Workforce Capacity

Opportunity For Change: Increase availability of evidence-based and promising practices (e.g., T-DBT, PDI, Copacarta).

Strategy I - Confirm availability of providers who are credentialled to provide specialty services that have been shown to have benefit in treating and supporting children and youth with specialty care needs. For example, the current system has capacity to serve 50 children with Multi-Systemic Therapy and the documented need for children who would benefit from this type of service is approximately 200 children (a gap leaving 150 children in need and at risk for justice involvement or acute serious crisis).

Value Proposition - Increasing availability of well trained and credentialled providers who are actively treating and supporting patients decreases risks for acute crisis, trauma, and justice involvement.

Emotional Well-Being

Opportunity For Change: Expand and enhance programs that promote emotional well-being, nurturing environments, and prevention of adverse childhood experiences.

Strategy I - Increase capacity and collaboration among schools and community organizations for a robust Multi-Tiered System of Supports model as endorsed by the Texas Education Agency's Long-Range Plan.

Strategy II - Increase promotion and availability of interventions that promote kindness and caring (e.g., random acts of kindness activities).

Strategy III - Strengthen Region 25 support and related school liaison functions (e.g., MTSS, PBIS, CDS, CYS).

Strategy IV - Expand and enhance promising practice school-based coordination of care (e.g., TCHTL).

Strategy V - Increase school coordination with community services to provide emotional well-being (e.g., mindfulness and resilience exercises - upstream interventions) and timely access to screening and access to treatment (e.g., recognizing mental health treatment access as an excused absence).

Value Proposition - A sound foundation of emotional health promotion and crisis prevention programs and services available where and when they are needed contributes to the ability for individuals and families to cope with life events and prevent adverse childhood experiences.

Progress Indicators: The Council will track relevant measures regarding data sharing among providers but the individual case and system levels and continuity of care between providers over time.

Consortium 2.0: Consortium leaders formed a sound foundation in 2015. As a result, El Paso partners have successfully increased mental health and substance use resources for the region, made significant improvements in the behavioral health system of care, and set the stage for the next phase of improvements.

The Consortium helps to foster, strengthen, and grow the regional partnership that creates change in the El Paso region. With the 2013 El Paso County Behavioral Health System Assessment, other relevant data and ongoing community feedback, El Paso County is prepared to take new steps toward achieving a vital behavioral health system of care.

To view or download the full 2013 El Paso County Behavioral Health System Assessment, visit www.healthpartners.org.

Get Involved: The Consortium is committed to paying collaboration where all partners are welcome, empowered, and unified to achieve the vision.

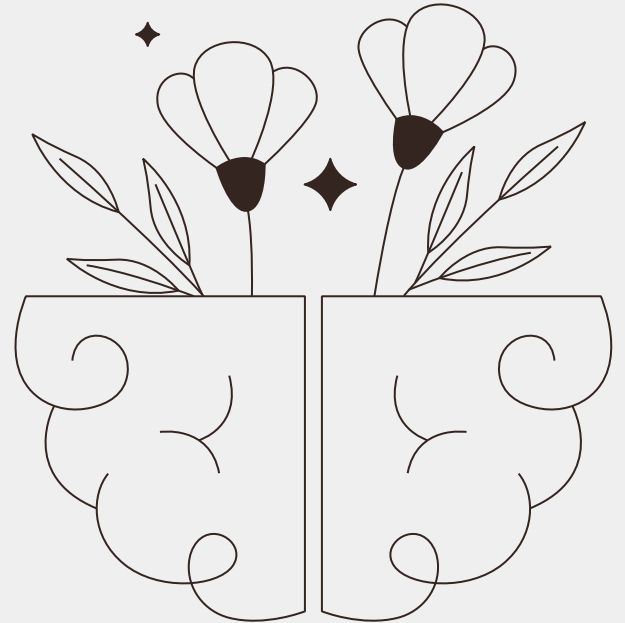

To learn more about the El Paso Behavioral Health Consortium, the 2013 El Paso County Behavioral Health System Assessment, or the Consortium Leadership Council, contact Terri Mata, Executive Director, Paso del Norte Center of Adolescent Mental Health Policy Institute, at terri@pasodelnorte.org, 915-253-0287 or Terri Mata, Associate Program Officer, Paso del Norte Health Foundation, at terri@pasodelnorte.org, 915-544-7638.

Please Note: The El Paso Behavioral Health Consortium does not provide health services of its own, such as mental health, substance abuse, or other services. The following are resources to help those seeking behavioral health services:
3-1-1 El Paso Resources: Afternoon 9am - 5pm - 915-253-2444
24-Hour Mental Health Crisis Line - 915-253-2444 or 915-755-8000
National Suicide Prevention Lifeline - 800-975-4848

SAMHSA

Mental Health Starts with Me (MHSM)

La Salud Mental Empieza Conmigo

What is MHSM?

A federal grant to increase access to effective trauma and grief focused treatment for children, adolescents, and their families living in El Paso County

Targeted population:

- Children 3-17 years of age & their families
- Demonstrate significant levels of trauma, grief, and disparities in mental health
- Special emphasis on children and youth attending rural Clint and San Elizario High School

MHSM Goals

1

Raise community awareness to promote support for youth and their families experiencing grief and trauma

2

Utilize outreach, coordinated screening, and assessment for early identification of youth who have experienced grief and trauma

3

Increase access to Evidence-Based Interventions for youth and their families

4

Support the development of Trauma-Informed and Grief-Focused Systems of Care in the county

Expected Outcomes

10%

Increase in:

referrals for trauma/grief experiences with community partners/providers and schools & trauma screenings and assessments for children/youth

40%

Increase in:

daily functioning and social connectedness (measured by NOMS)

5%

Increase in:

referrals to caregivers for children/youth

75%

of families in treatment will experience a decrease in trauma and grief symptoms (measured by BPTSD-RI)

15%

of parents completing training programs will report a decrease in defiant behavior and an increase in nurturing skills.

An illustration on the left side of the page shows two hands, one above and one below, holding a stylized brain. The brain is depicted with a central vertical line and symmetrical, rounded lobes on either side. Two small black diamond shapes are placed near the brain, one to its right and one to its left. The background features a light green circular shape and a dark blue abstract shape in the top right corner.
